

CLUSTER FLY TREATMENT PREPARATION CHECKLIST & INFORMATION

People & pets are required to be out of the service area for the duration of the treatment, and for the 2 hours after the treatment was completed to allow the product to dry properly.

Exterior Areas That Will Be Treated:

- Technicians will apply a mist spray to the entire house with emphasis on the windows, and the sunnier sides of the house
- Along any additional problem areas discussed with the technician

Interior Areas That Will Be Treated:

- Along the baseboards of all levels of the home
- Around all windowsills
- Along any additional problem areas discussed with the technician

Preparation for Treatment

Ensure you, and all pets have somewhere to go for 2-3 hours, as you will need to be out of the house for the duration of the treatment and for 2 hours afterward.

- Pick-up any clothes or toys that are on the floor
- Make sure that all food is covered and or put away
- Cover all fish tanks with a blanket or a towel
- Ensure technicians have access to baseboards on the main level of the home (*it is not necessary to move furniture, technicians can spray under/around it*)

Safety of Treatment

Technicians will use Dragnet (diluted to 0.05%) to spray the home, which is safe for both people, including children, and pets, with the exception of fish. For more information, download a Material Safety Data Sheet from our website [here](#).
